

# I-10 (Tangerine Road to Ina Road) Study

November 2013

## STUDY OVERVIEW

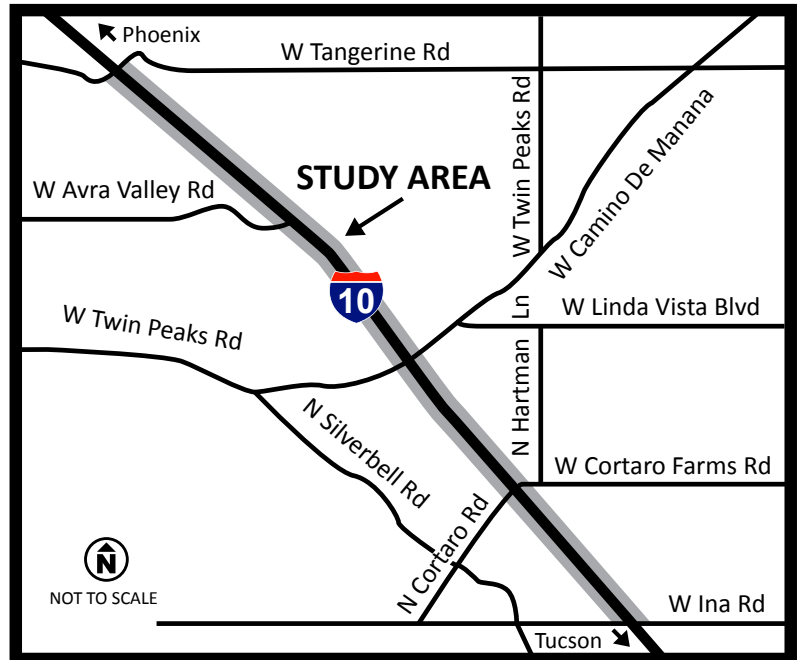

The Arizona Department of Transportation and Federal Highway Administration are conducting an engineering and environmental study of Interstate 10 between Tangerine Road and Ina Road. The goal of this study is to develop a long-range plan for an improved roadway along this portion of the I-10 corridor. To support that goal, the study will:

- ▶ Develop and evaluate possible alternatives to widen I-10 and reconstruct the Avra Valley Road and Cortaro Road traffic interchanges
- ▶ Review potential improvements to frontage roads in the study area

The study will follow the requirements of the National Environmental Policy Act.

### The Study Will Include:

- ▶ Alternative Selection Report to identify and assess possible alternatives, including the consequences of not making any improvements along this corridor (no-build alternative)
- ▶ Design Concept Report (DCR) to document the preferred alternative
- ▶ Document public and agency outreach, and the potential impacts to the social, economic, natural and cultural environments Corridor Implementation Plan for recommended improvements.

Public participation is an important part of the study process. Since the public meeting process is complete, you may also visit the study website at [www.azdot.gov/tangerine2ina](http://www.azdot.gov/tangerine2ina) to stay up to date on the study progress, provide input by email or subscribe to receive email updates.

### Study Process

The study is currently in the process of being finalized.

Further construction phases of this project beyond this initial study are currently unfunded in the Statewide Transportation Program. Once funding is identified, a public hearing will be held, the environmental documentation can be finalized and final design and construction phases can begin.

## SCHEDULE

<b>October 2011</b>	Study kick-off; scoping began
<b>December 2011</b>	Public and agency scoping meetings
<b>Spring 2012</b>	Development of possible alternatives
<b>May 2012</b>	Public meeting to review and provide feedback on the possible alternatives
<b>Fall 2012</b>	Technical analysis to develop the preferred alternative
<b>February 2014</b>	Final DCR to be released
